Re: Federal Trademark Application Publication Confirmation (my ref: VectorNLS-T-01)

Dear Anatoliy,

This letter is to confirm that your trademark application serial number 86/674,843 for VECTOR NLS BIOFEEDBACK will be published on January 16, 2016 in the Official Trademark Gazette for a thirty day publication period.

During this time, any other entity who has a potentially conflicting mark may institute an opposition proceeding against your trademark application or request additional time to do so. If an opposition is received, your application will be suspended pending the outcome of the opposition proceeding with the Trademark Trial and Appeals Board. However, assuming that no opposition or extension to file an opposition is received during the publication period, your application will mature into a federal registration.

In closing, no further action is required by you at this point. We must merely wait for the public opposition period to pass.

Sincerely,

A handwritten signature in blue ink, appearing to read "Daniel J. Mills". The signature is fluid and cursive.

Daniel J. Mills
Attorney

Encl. (email): Notice of Publication
